## Professional Summary

Frontend Developer with a foundation in electrical engineering and hands-on technical project management. Transitioned from renewable energy and CCTV solutions to web development, driven by a passion for solving global technology challenges. Skilled in React, JavaScript, and modern frontend tools, with proven ability to deliver scalable, user-friendly, and accessible applications. Combines engineering discipline, problem-solving, and leadership experience to contribute to collaborative, global software projects.

---

## Technical Skills

- **Languages & Tools: HTML5, CSS3, JavaScript (ES6+), Git/GitHub**

- **Frameworks & Libraries: React.js (Hooks, Context API), Tailwind CSS, Bootstrap**

- **Other Skills: Responsive Design (Flexbox, Grid), Figma-to-Code Conversion, Debugging & Browser DevTools, Basic SEO for Frontend**

- **Soft Skills: Problem-Solving, Client Communication, Team Collaboration, Project Leadership**

---

## Professional Experience

**Frontend Developer (Freelance) —** *Jan 2023 – Present*

- **Built and deployed multiple responsive web applications using React and APIs.**

- **Converted Figma designs into production-ready websites optimized for all devices.**

- **Solved 10+ coding challenges, improving problem-solving speed by 20%.**

**Key Projects:**

- **Recipe Finder App — React, TheMealDB API**

  - **Built a recipe search platform with API integration and responsive UI.**

- ○ **Added search suggestions and recipe detail pages for better user engagement.**

- ○ 🔗 **[Live Site](#)** | **[GitHub](#)**
- ● **SalesSkillHub Portfolio Website**

  - ○ **Designed and developed a portfolio site with project showcases, navigation for SalesSkillHub**

  - ○ 🔗 **[Live Site](#)** | **[GitHub](#)**

- ● **Springillez Engineering**

  - ○ **Designed and developed a responsive engineering services website with modern UI.**
  - ○ **Implemented reusable React components and optimized layouts for cross-device compatibility.**
  - ○ **Ensured fast load times and accessibility compliance to improve user experience.**

  - ○ 🔗 **[Live Site](#)** | **[GitHub](#)**

---

**Project Manager & Technical Lead — Somex Technology — *Mar 2020 – Nov 2023***

- ● **Directed 50+ technical implementation projects, ensuring 95%+ client satisfaction and 100% on-time delivery.**

- ● **Managed teams of 5+ technicians, applying structured workflows that reduced project turnaround time by 25%.**

- ● **Improved project outcomes through agile-like planning, stakeholder communication, and quality assurance.**

---

**Founder & Technical Lead — StarnTech Technology — *Jan 2024 – Present***

- ● **Established and managed a tech solutions company delivering renewable energy and security technology projects.**

- ● **Oversaw end-to-end technical projects: from requirement gathering to design, execution, and delivery.**

- ● **Strengthened client relationship management and project execution, directly transferable to software project delivery.**

## Certifications

- **Frontend Developer Career Path — *Scrimba* (Aug 2023 – Nov 2024)**

- **Software Engineering Foundations — *ALX* (in progress)**

## Languages

- **English — Native**

- **Igbo — Native**

## Interests

- **Passionate about coding & continuous learning**

- **Enjoy problem-solving & logical challenges**

- **Football enthusiast & team sports lover**

- **Teaching and helping others grow in tech**
